Public Works Department
Bureau of Street Lighting
Department of Water and Power
City of Los Angeles

The Quality and Productivity Commission offers its congratulations to your Departments' employees and staff for the "LED STREET LIGHTING ENERGY EFFICIENCY PROGRAM" project. It has been selected for a QPC Award of 2010.

The City Council has agreed to present your award on Friday, October 14 in Council Chambers. Your staff responsible for this excellent example of the dedication of our City employees are invited to a reception in the Rotunda of City Hall at 9 AM. At 10 we will move into the Council Chambers for the presentation.

In addition to the Departmental award, the Commission has six certificates which the Department may award to key individuals in recognition for their contributions to your winning project.

On behalf of the QPC Commissioners, I wish to offer our thanks and gratitude to such a deserving group of city employees. They only improve our City with their attitude, dedication, and "can do" spirit.

With sincere appreciation,

Ed Young

Quality & Productivity Commission

2011 Quality and Productivity Awards

Environmental Projects Award

Presented to the

Department of Public Works

Bureau of Street Lighting

For your outstanding dedication, innovation, and teamwork for:

“LED Street Light Energy Efficiency Program”

This project exemplifies the benefits of cooperation. The Department of Water and Power provided the financial backing that included rebates and loans. The Bureau of Street Lighting's New Technology Group spearheaded the use of LED for civic projects. The Mayor's office coordinated this five-year plan which focused on adopting new technologies and improving efficiency. Using LED units to replace current incandescent lamps, the City will generate a 40% energy cost savings, or \$1.6 million, over the seven year span of the DWP loan. Once the DWP loan is repaid, the City will receive \$10 million in annual energy cost savings.
